# ClearPoint 12.5 Release Notes

## Peer-to-Peer Sharing & Measure Library

- **Shared Series:** Automatically pull peer data into your account for calculations, charts, and one-off benchmarks.
- **Custom Groups:** Create and join groups to share and leverage data with select peers.
- **Integrate ClearPoint with Benchmarking Platform:** Eliminate double data entry and utilize benchmark data in your regular performance reporting.
- **Timestamps:** Find recently updated measures by sorting on 'Last Updated' in the Measure Library.

## User Interface Enhancements

- **New Collaborators Field:** A new design should make this popular field even easier to use.
- **Duplicate Periods:** New controls will help prevent accidental addition of duplicate periods.
- **Master Measures Chart Options:** Users can now successfully select a Custom Chart JSON Template, as well as 'Clear JSON' to start over, for Master Measure charts.
- **Strategy Map Size:** We have allowed for greater flexibility so that strategy maps can take up more space on the page.
- **Image Display:** A slight tweak of the image display configuration will allow for user uploaded images to display over multiple sessions online.

## Exporting

- **Excel Exports:** Collaborators and other multi-picklist fields included in a summary report will now display information in a list separated by semi-colons (rather than spaced out within the cell) when exported to Excel.
- **Custom Gantt Widths:** Provides the ability to adjust the width of the 'Name' section of the Gantt chart to include full initiative and milestone names for PDF exports.

## Template Scripting **Enterprise only**

- **Create reusable templates** to save time on common tasks such as**:**
  - *Add identical objectives to department scorecards*
  - *Edit charts for multiple measures*
  - *Edit summary reports across multiple scorecards*
  - *Bulk update initiatives based on same criteria*
  - *Edit all user settings at once*
  - *Add new measures or jurisdictions to benchmarking account*
  - *Plus many more! Let us know if there is a task you repeat often and we'll see if it can be scripted!*

## ADA Compliance

- **Accessibility:** Increased accessibility according to WCAG 2.1, ADA, Section 508 through new optional plug-in. Let us know if you want this enabled for your account!

## Calculations & Evaluations

- **Shared Series:** Automatically pull peer data into your account for calculations, charts, and one-off benchmarks.
- **Aggregate Status Scorecard Selection:** Increased flexibility when selecting scorecards for aggregate status calculations.
- **Calculated Fields Test Button:** The test button will now allow you to preview the first 25 measures for the scorecard selected.
- **Automatic Objective Evaluation Fix:** When a measure is linked to an objective and its child, it will only be included once if selected for the objective's automatic evaluation.

## Content Security

- **Invalid Content Policy:** Increased security for values entered into HTML fields will notify users if the HTML structure is a potential security risk.
